POLARIS®

Online Substation Equipment Condition Monitoring System

A Totally Open Solution

POLARIS®
An Open Integrated Equipment Condition Monitoring Solution

- Fully Open Architecture
- Scalable
- Flexible
- Easy to Integrate

FOR ABB® Line

- Integrated various condition monitoring devices
- Economic, open, and modular architecture
- Provides central alarm/event notification and condition reports via e-mail
- All modules run independently, and have OPC interfaces
- Ready to be integrated into substation automation

FUNCTIONS

- Monitor Equipment Health
- Alarm Management
- Condition Monitoring
- Data Acquisition
- Reporting
- Configuration Management
- User Management
- Audit Trail
- Data Archiving
- Data Backup/Restore
- Data Transfer
- Data Integration
- Data Export
- Data Import
- Data Query
- Data Search
- Data Filter
- Data Sort
- Data Group
- Data View
- Data Print
- Data Export
- Data Import
- Data Query
- Data Search
- Data Filter
- Data Sort
- Data Group
- Data View
- Data Print
